

Angel David Ramirez Flores

Bronx, NY | dgju04@gmail.com | (646) 804-8421 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-stack software engineer with hands-on experience building production-grade web applications using React, Next.js, TypeScript, Java, and Spring Boot. Proven track record delivering responsive UIs, RESTful APIs, and AI-integrated platforms across internship, training, and freelance roles. Adept at working across the stack from database to deployment, with a strong foundation in computer science and a focus on clean, maintainable code.

EXPERIENCE

Associate Software Developer

March 2025 – June 2025

Infosys

Hybrid

- Developed internal applications and proof-of-concepts while applying software development best practices and debugging techniques.
- Collaborated with team members on coding exercises, code reviews, and testing activities to deliver high-quality solutions.
- Applied Java, Spring Boot, SQL, and cloud technologies through intensive technical training and hands-on projects.
- Completed technical certifications and upskilling programs to maintain project readiness and support future client engagements.

Frontend Engineer

September 2024 – April 2025

Skinstric AI

Remote

- Architected real-time skin analysis platform using OpenAI Vision API and Next.js, achieving 98% detection accuracy across diverse skin conditions.
- Developed responsive UI with TailwindCSS and GSAP animations, implementing dynamic skincare recommendation cards with 60% improved engagement.
- Optimized performance using Next.js Server Components and Lottie animations, achieving sub-2-second analysis time for skin condition detection.
- Built custom animation system using GSAP timeline for seamless user experience during skin analysis processing, increasing user retention by 40%.
- Implemented efficient image processing pipeline combining OpenAI Vision API with 4D Mini model for enhanced accuracy in skin tone and texture analysis.

Full Stack Java Developer

September 2024 – March 2025

Revature

Remote

- Developed RESTful web services using Spring Boot and integrated front-end components using React.
- Implemented CRUD operations and handled API integration using Postman and Swagger.
- Applied Java APIs to design and implement algorithms addressing complex programming challenges.
- Managed version control with Git and coordinated development workflows using Agile/Scrum methodologies.

Frontend Developer and Support Staff

January 2024 – August 2024

Frontend Simplified

Remote

- Selected as peer mentor after achieving top 5% performance in cohort, providing debugging support and code reviews for 20+ students across React and Next.js projects.
- Created and led workshops on modern frontend optimization techniques, helping students improve portfolio project load times by an average of 50%.
- Developed comprehensive learning resources for React component architecture and TypeScript, resulting in 70% of mentored students successfully implementing type-safe applications.
- Built and shared reusable component library using ShadCN/UI, reducing development time for student projects by 40% and improving code consistency.
- Led study groups on deployment strategies and CI/CD, resulting in 85% of students successfully implementing automated deployment pipelines.

PROJECTS

NFT Marketplace <https://angel-ramirez-intership.vercel.app/>

- Built a fully functional NFT Marketplace web application with interactive NFT browsing, collection exploration, and user transaction flows.
- Implemented dynamic routing, responsive UI design, and state management for smooth navigation and real-time user feedback.
- Integrated wallet connectivity, persistent data handling, and reusable components with mobile-friendly layouts.

Skinstric AI <https://angel-ramirez-skinstric-intership.vercel.app/>

- Built a full-stack AI skincare assistant platform enabling users to explore personalized skincare insights and product recommendations.

- Implemented dynamic routing for detailed skin analysis pages, integrated API-driven AI responses, and designed a fully responsive UI with optimized loading states.

Summarist <https://angel-ramirez-advance-project.vercel.app/>

- Built a full-stack, responsive book summary platform using Next.js and TypeScript with Firebase authentication, Firestore data management, and Stripe-based subscriptions.
- Developed API-driven book search, dynamic routing, and audio playback features with optimized performance and loading states.

SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Spring Boot, Spring Framework, TailwindCSS, Redux, React Query, React Hook Form, Hibernate, Bootstrap

Tools & Platforms: Git, GitHub, Docker, AWS, Firebase, Supabase, Node.js, Vercel, Netlify, Postman, Jest, Stripe, Figma, Vite

Other: RESTful APIs, Agile/Scrum, Object-Oriented Programming, Unit Testing, CI/CD, PostgreSQL, MySQL

EDUCATION

Lehman College <i>Bachelor of Science in Computer Science.</i> Relevant Coursework: Data Structures, Mobile Programming, Machine Learning, Data Science, Databases	Bronx, NY May 2024
Bronx Community College <i>Associate Degree in Computer Science. President's List (March 2021), Dean's List (June 2021).</i>	Bronx, NY May 2022
