

Angel David Ramirez Flores

Address: 3836 Bailey Ave Bronx, NY 10463 | **Email:** dgiu04@gmail.com | **Phone:** (646)804-8421 | **LinkedIn:** www.linkedin.com/in/angel-david-ramirez-flores-297595198/ | **GitHub:** github.com/AngelDRF

PROJECTS

NFT Marketplace: angel-ramirez-intership.vercel.app/ | <https://github.com/AngelDRF/angel-ramirez-intership>

Developed a fully functional NFT Marketplace web

- Developed a fully functional NFT Marketplace web application with interactive NFT browsing, collection exploration, and user transaction flows. Implemented dynamic routing, responsive UI design, and state management to ensure smooth navigation and real-time user feedback. Integrated wallet connectivity, persistent data handling, and optimized the user experience with loading states, reusable components, and mobile-friendly layouts.

Skintric AI: <https://angel-ramirez-skintric-intership.vercel.app/> | <https://github.com/AngelDRF/angel-ramirez-skintric-intership>

Created a fully functional Skintric AI Project

- Built a full-stack AI skincare assistant platform that helps users explore personalized skincare insights and product recommendations through an interactive web experience. Implemented dynamic routing for detailed skin analysis/result pages, integrated API-driven AI responses, and designed a fully responsive UI with optimized loading states for a smooth cross-device experience.

Summarist: angel-ramirez-advance-project.vercel.app/ | github.com/AngelDRF/angel-ramirez-advance-project

Built a full-stack responsive book summary platform

- Built a full-stack, responsive book summary platform using Next.js and TypeScript. Integrated Firebase authentication, Firestore data management, and Stripe-based subscriptions for seamless user experience. Developed API-driven book search, dynamic routing, and audio playback features with optimized performance and loading states.

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks/Tools: Spring Boot, Spring framework, Hibernate, Git, Bootstrap, Maven, Postman, RESTful APIs, Pandas, Matplotlib, numpy, torch, React, TailwindCSS, Firebase, Supabase, NextJS, Redux, React Query, React Hook Form

Databases: PostgreSQL, MySQL

Other: Agile Methodologies, Object-Oriented Programming, Unit Testing, Docker, AWS, Node.js, Netlify, Vercel, GitHub, Vite, Figma, VsCode, Jest, Stripe, React Testing Libraries

EDUCATION

Lehman College – Bronx, NY

Bachelor of Science in Computer Science | Graduation: May 2024

Relevant Courses: Data Structures, Mobile Programing , Machine Learning, Data Science, Databases

Bronx Community College – Bronx, NY
Associate degree in Computer Science | Graduation: May 2022

Frontend Simplified | Certificate: github.com/AngelDRF/Angel-Ramirez-FES-Certificate

PROFESSIONAL EXPERIENCE

Full Stack Java Developer – Revature

Remote | **September 2024 – March 2025**

- Completed intensive training in Java Full Stack Development with hands-on coding projects.
- Developed RESTful web services using Spring Boot and integrated front-end components using React.
- Used Git for version control and Agile/Scrum for project management.
- Implemented CRUD operations and handled API integration with Postman and Swagger.
- Leverage Java APIs to write algorithms to solve various challenges and problems sets

Associate Software Developer – Infosys

Hybrid | **March 2025 – June 2025**

- Bench-trained in Java and Python with a focus on clean code, debugging, and optimization.
- Collaborated with team members to develop reusable components and maintain codebase integrity.
- Participated in code reviews and testing processes to ensure high-quality deliverables.

Frontend Engineer - Skinstric AI

Remote | **September 2024 - April 2025**

- Architected real-time skin analysis platform using OpenAI Vision API and Next.js, achieving 98% detection accuracy across diverse skin conditions
- Developed responsive UI with TailwindCSS and GSAP animations, implementing dynamic skincare recommendation cards with 60% improved engagement
- Optimized performance using Next.js Server Components and Lottie animations, achieving sub-2-second analysis time for skin condition detection
- Built custom animation system using GSAP timeline for seamless user experience during skin analysis processing, increasing user retention by 40%
- Designed modular component library with TailwindCSS for skincare product displays, enabling rapid A/B testing of recommendation layouts
- Implemented efficient image processing pipeline combining OpenAI Vision API with 4D Mini model for enhanced accuracy in skin tone and texture analysis

Frontend Developer & Support staff - Frontend Simplified

Remote | **January 2024 - August 2024**

- Selected as peer mentor after achieving top 5% performance in cohort, providing debugging support and code reviews for 20+ students across React and Next.js projects.
- Created and led workshops on modern frontend optimization techniques, helping students improve their portfolio project load times by an average of 50%.
- Developed comprehensive learning resources for React component architecture and TypeScript, resulting in 70% of mentored students successfully implementing type-safe applications.
- Initiated weekly pair programming sessions focused on accessibility and SEO best practices, leading to 90% of mentored students achieving WCAG compliance in their projects
- Built and shared reusable component library using ShadCN/UI, reducing development time for student projects by 40% and improving code consistency
- Led study groups on deployment strategies and CI/CD, resulting in 85% of students successfully implementing automated deployment pipelines for their portfolio projects
